West Wirral Medical Centre, West Wirral

CareCapital are working with West Wirral Group of Practices and Wirral PCT to create a new, purpose built facility to enhance the healthcare provision for the area.

High quality healthcare accessible by all

The new purpose built surgery will provide 1,713 m² of medical space for 9 GPs, who will be able to offer a range of health services for the community.

The rest of the 2,028 m² site will house a pharmacy and 98 car parking spaces.

Building the best

One of the major achievements of this building is its ecological credentials. Built to BREEAM Very Good standard, it has a low carbon footprint and green roof.
