Surgery scoops top award for service

A MEDICAL practice in Leamington has been named top of the docs in a new government report.

General practitioners at the Waterside Centre achieved full marks in the Quality and Outcomes Framework, which judges practices on the standard and variety of care offered to patients.

The Court Street surgery was

awarded points for providing for patients with on-going conditions such as diabetes, epilepsy and asthma, good patient communication and offering extra services such as cervical screening and maternity care. Along with a surgery in Shipston, it was the only one in south Warwickshire with a perfect score.

Practice Manager Tim Morris

said: "The achievement of maximum quality points reflects the effort of the whole team at Waterside Medical Centre. The doctors and staff work extremely hard to deliver the best possible service to our patients and we are all delighted at our achievement."

South Warwickshire GPs were rated third in the country overall.
